2011-2011

PROJECT DESCRIPTION

3G constructed and sold a set of 10 microFIT projects to the City of Kingston on various municipal buildings.

3G undertook the solar yield assessment work, designed and priced the system in a competitive bid, and won the assignment.

3G arranged model supply from Canadian Solar Inc and racking supply by ISYS as well as Schletter Racking.

3G hired its team of Ottawa solar PV rooftop installers and arranged the lodging for them to work at Kingston.

Scope of Work:

- ◆ Solar resource assessment
- ◆ Economic Feasibility and Project Cost Estimate
- ◆ Arrange structural engineering
- ◆ Arranged electrical engineering
- ◆ Onsite Supervision of Construction work
- ◆ Commissioning of the project
